

ROCKRIDGE[®]

ABRASIVES

Products Guide

Loose Abrasives

Garnet

Garnet is great for blasting and waterjet cutting applications. RockRidge ensures that our Premium Garnet is a non-ferrous, 100% natural mineral abrasive that is environmentally inert.

Glass Beads

Glass Beads break down at a slow rate allowing for continuous recycling. Due to the shape of Glass Beads, they clean, finish,peen, and deburr, allowing for a unique surface finish.

Aluminum Oxide (Brown & White Fused)

Aluminum Oxide is suitable for wet or dry surface preparation, cleaning, deburring, and cutting of various metals, ceramics, glass, wood, rubber, plastic, stone, and composite materials.

Steel Abrasives

RockRidge steel shot, grit, and wire give excellent performance in many blasting applications for many different industries.

Silicon Carbide (Black & Green)

Silicon Carbide is an extremely hard abrasive grain that is useful in many blasting applications when high-cutting is desired.

Plastic Media

RockRidge supplies customers with a variety of plastic media including, type II (Urea), type III (Melamine), and type V (Acrylic), to support many different applications.

RockRidge was created by a collective of abrasive specialists who wanted to supply our customers with high-quality abrasives that we have hand-selected and thoroughly tested.

Coated & Non-Woven Abrasives

Resin Fiber Disc

- 4.5", 5", & 7" discs with 7/8" arbor or 5/8-11 hub available.
- Abrasive type options are aluminum oxide, zirconia alumina, ceramic alumina, or ceramic alumina supreme.

Sanding Discs

- Aluminum oxide discs available in paper or film backing with either PSA or hook-and-loop attachment options.
- Grit range: 40-3000
- In 5 or 6 inch sized discs

Flap Discs

- Flap discs are available in either zirconia alumina or ceramic abrasive grains.
- 4.5" discs with Type 27 or Type 29 shapes available.

Hand Pads

- Hand pads are 6"x9"
- They come in extra cut (tan), medium (black), fine (green), very fine (maroon), and ultra fine (gray).

Quick-Change Discs

- Quick-change discs sold in 2 or 3 inch sizes with Type R or Type S available for attachment styles.
- Available in coated or non-woven types.

Waterjet Cutting Parts

RockRidge supplies garnet for many of our waterjet customers, so to support them with maintenance, we added replacement parts to our product line.

We have replacement parts for AccuStream, Flow, Jet Edge, KMT, OMAX, WSI, and high-pressure

Vibratory Abrasives

RockRidge plastic and ceramic media is available in many sizes and compositions to best fit your process and application.
